

RL-01

REMOTE LED INDICATOR

This single gang Remote LED indicator provides a bright LED indication of a detector operation when connected to the remote LED output of most types of smoke and heat detectors.

Simple to install on industry standard 60mm screw fixing centres, this LED indicator includes options for connecting to a conventional system via an in built resistor or directly to an addressable detector bypassing the resistor.

Key Features

Quick installation, Operates with most types of detector
Low power consumption, Standard fixings

Product data

Dimensions

Width	86mm
Height	86mm
Depth	10mm
Fixing centres	60mm

Specification

Material	White ABS
Body colour	White
Conventional connection	1K Ohm + LED
Addressable connection	LED
Fixing method	2 x M3.5 x 20mm screws
Application type	In door use
Wiring	Terminals up to 1.5mm ²
